Dear Per,

Sorry for delay, I've been also auditing and transcribing so you can get # 4 & # 7. It's in the final stages now. Corrected (by me) copy is going into print-out very soon and I'll send it. When correcting the transcripts (done by Germans & Spanish Pre-OTs), I realized that they had quite a few M/Us. Not so much on the Basic Ideas on the tapes, but the examples and explanations of theory. They put other "words" in or combined sentences wrongly. So when you get these, MAKE SURE THEY ARE TRANSLATED FROM ONLY THESE AND NOT THE TAPES. Also CALL IN THE GUYS WHO ARE ON IT TO READ THE TRANSCRIPTS OR YOUR CORRECTED TRANSLATIONS. OK? - this will prevent M/Us and errors in running.

Next point - not covered on "EXCALIBUR", but on the "PHOENIX" are certain phenomenon concerning "special cases" of thetans they run into. Now I'm finding people who are running into them in PLUGS too. So I give you the tech of how to handle:

A)  $\emptyset$  THETANS ( $\emptyset$  = MEST) or "TEENIE-WEENIES"

These are smaller - "junior size" Thetans that were DUMPED "into" (or BECAME PART OF the MEST universe) from Earlier Universe Games. They were NOT captured. They were DUMPED. They are "resistive" because they DON'T LIKE "BIG THETANS" AT ALL. Even Xenu COULDN'T use them in Pre-I plugs hardly at all because they refuse to DO or BE anything else or change in anyway for a "big Thetan". (That's one reason he HAD to C A P T U R E Thetans who were "more moldable" into anything and still would "go for" another "game".)

HANDLING: You might find one or two of these  $\emptyset$  Thetans at the bottom of a plug or in a "bag" of jelly beans. After all the JBs have blown - these guys still will be there.

0) "DUMPED INTO THE MEST UNIVERSE?"  
 (if it reads)

- 1) Realize they have an ARC BREAK OF LONG DURATION that may go back as far as 100 CENTILLION YEARS (100 X 10 high 303) (when you get a read on "DUMPED into MEST U?") and that they "joined" up with other  $\emptyset$  Thetans in a sort of "social democracy) of their own as "LOSERS" and adopted a sort of rules to "take care of MEST" and don't listen to any big Thetan EVER. (because that's who dumped them)
- 2) Run the ARC Break LD by finding: "How long you had it? - (up to 100 CENTILLION years) - 10, 20, 30, 40, etc.....," Assess, indicate the BFC. (It's usually "REJECTED AFFINITY" from the big Thetan who dumped them.)
- 3) If they don't blow on ARCBLD, use "Rights of a Thetan", Valence Process, Orientation. They will blow.

\*\*\*\*\*

## B) ⑤ THETANS or "STATIC" THETANS

These are BIG Thetans who RARELY get trapped by anything, but may have popped up in the session because of all the "beings going free" and want to find out "how it's done" or PRETEND to be "in the plug" so they can "experience" auditing. The difference is these guys are FULLY AWARE OF THE GAME between Xenu and Elron Elray (implanting vs freedom) but HAVE NOT TAKEN PART IN EITHER SIDE. They think they are very "PAN-DETERMINED", KNOW-BEST, and "NOTHING TO DO WITH ME" - B U T they have been "meddling around" into the affairs of Thetans in the MEST Universe and DIDN'T HAVE ANY TECH. So that's what they are interested in.

HANDLING: REALIZE an ⑤ Thetan has OUT-RUDs and doesn't have any real TECH although he may tell you all kinds of "I'm a powerful being - I controlled whole civilizations here on Earth as a God" etc.

- 1) FIND OUT-RUDS AND HANDLE E/S TO BIG F/N, Cog. (usually it's M/W/H or W/Hs) (or OVERTS or EVALUATION)
- 2) R-factor: "This is ELRON ELRAY'S TECH. You see it works. (a) Do you want to HELP? or (b) Do you want to return to STATIC STATE?" (Rights of a Thetan can be given too.) (V.P. doesn't usually produce any result because an ⑤ Thetan will always answer "me").
- 3) Handle by: (a) giving him a job that he likes (usually in line with his former interest that produced the OVERTS, but now he can use TECH to handle.) (b) OR say: "Good; your session is over - RETURN TO STATC STATE".

\*\*\*\*\*

## C) MOCOVP, "MOCO", or CREATED VIEWPOINT

These are Thetans who have a limited ability because they were CREATED by a "big Thetan" on a postulate to DO or BE only certain things or only ONE THING.

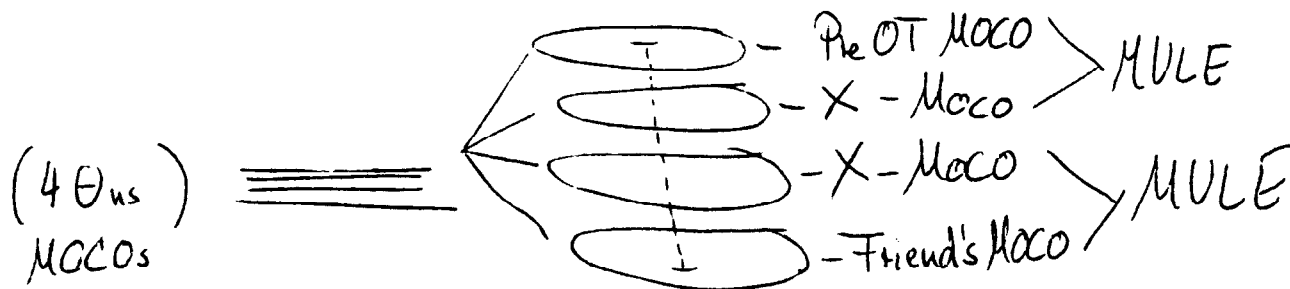

The "MOCOVP" name is an abbreviation of the process used to handle. It means "Moment Of Creation Of View Point". They also ONLY HAVE A TRACK AS LONG AS IT WAS FROM THEIR "MOMENT OF CREATION" TO PT.

However, they can have been created in an E/U game - say to "run" a mock-up for a "big Thetan" - and maybe then get neglected, dumped, or CAPTURED by Xenu to use in a PLUG ON THE BIG THETAN who made him. This gives the Pre-OT a "strange" AFFINITY for what's in the PLUG as it's really a PART OF HIMSELF. Look at it as a "Thetan in PAWN" type of thing.

But Xenu didn't just "capture" and "use" these MOCOs, he also would MULE them with a MOCO of HIS OWN. (A MULE is a cross-breed between a "Horse and an Ass".) That is, create one of his own viewpoints and "cluster" it with the Pre-OTs VP.

Or he might have captured a FRIEND's (of the Pre-OT) MOCO, MULED it and put it in a PLUG

When found, they CAN be like a "sandwich":

- The affinity line between the "Pre-OT and his friend" creating a "tie" which "holds" together the sandwich and keeps Xenu's MOCOs (2 of them) held in the middle - a nice 3rd Party arrangement.

These "MULES" can be VERY EFFECTIVE in abberating the Pre-OT because Xenu or his "Plug Chiefs" can transmit Xenu's INTENTIONS to his MOCOs, and they immediately activate the Pre-OT's (and his friend's) MOCOs if both have one in the PLUG. (Sometimes it just is one MULE of the Pre-OT's MOCO and X's MOCO, but the EFFECT is there too.)

HANDLING: MOCOs occur when found on-Super NOTs usually near the top of a PLUG or in a "BODY" formed from Pre-liers or in something in a plug that seems "valuable" to the Pre-OT.

AUDITING: Other SUPER NOTs handlings didn't seem to fully blow it, and Pre-OT has a strange "fixation" on it - his attention won't come off it - needle stays "still" or gives repeating read but no blow. He may even say: "Xenu is not really a bad guy, you know?"

1) Ask: "Is this a (Audited).. Are you a (Solo) CREATED VIEWPOINT?" usually a Big LF or LFB if it is!

2) Assess:  
MINE.....?  
XENU'S.....?  
ANOTHER'S.....?  
"MULE MOCO" or "MULED".....?  
(or DUAL MOCO)  
MINE & XENU'S.....?  
ANOTHER'S & XENU'S.....?

3) Sort out what is there and handle as follows:

If only a "MOCO":  
a) Run the incident of...  
...being put into the plug  
...being captured (if not X's)  
...being created  
b) "Return to the MOMENT OF YOUR CREATION OR GO FREE!" (Tone 40)

If a "MULE":  
c) Run the incident of...  
(..being put in the stack) (if needed)

...being STUCK TOGETHER

d) Now you have split them up, take X's MOCOS and do a) & b) above, then the friends (if any) MOCOS, then the Pre-OTs MOCOS.

Later, as the Pre-OT's power comes up, he can identify the MOCO, and just run any "MULE" incident, and command b). If the Pre-OT is surprised that his own MOCO didn't "Blow", but DID "DISAPPEAR" it's because he "returned to the moment of creation" and BECAME PART OF THE PRE-OT ONCE AGAIN. The Pre-OT may feel a small "surge" of awareness when this happens, or he may laugh when it "returns".

This should clean up any "strange" Thetans, the guy runs into - as I said in the tapes, don't be surprised at anything!

Love

Capt. Bill
